

Qi Men Dun Jia Professional Formation Course

Dr. Alejandro Peñataro Sánchez

Institute of Daoist Management and Consulting - Daomac ®

Taipei, Taiwan

Description of the Course:

In your hands is now the chance to receive at once the result of many years of experience researching, practicing and teaching Qi Men Dun Jia all around the globe: this all on the background of the academic excellence and the distinctive transmission of knowledge of a millenary daoist Linage.

Learn any time and anywhere at your own pace

Here I decided to make available online the professional formation courses so that even more people can profit from these valuable knowledge in the most convenient form of learning.

In order to give you a chance to feel the taste of our presence courses we have selected the video material from the live recordings of our courses and webinars. Thus you can see how we deal general and personal cases of our students on the spot and see how do they give straightaway a feed back of the analysed and prognosticated case.

Your dedicated Official Daomac Teacher, a personal coach will be assigned you to be by your side in your Qi Men Dun Jia training and have a videoconference session after each module. After the completion of the training I will join you both in an extra videoconference for meeting in person and exchanging impressions.

One year of professional *plus* membership in the www.qmdj.biz calculation machine of Daomac is included in price so that you can make your personal use of the system unrestricted and unlimited while you achieve your expertise.

From 0 to 100% capability is the target, therefore the structure of the contents is build up in a way that any student without previous knowledge can learn the millenary system, get a solid formation and use it first for one's own prognostications and strategies, and then come up to apply it for professional consultations.

Do I need to learn Chinese for that? No, don't worry. This is a common question at the beginning. Indeed as we are using the Chinese original calculation charts in this method the student will get familiarized passively with all these characters nevertheless it will not be required in our course to learn them: there always will be provided a Pinyin Transcription and a Shortcut - Association Meaning with the Character in order to assure the clarity in the system. In our

additional materials however you can find videos and instructions how to write the different basic characters.
